---

I think the Australian government should concentrate more on how to provide better education to our kids better curriculum as the level of Australian education has decreased comparing to the other countries

And stop pushing the schools to new rules as a mum I chose Maronite Catholic school for my kids and I'm paying for that because it reflects my culture my morals and I don't think it has any issues with discrimination I believe that discrimination is what you do when you try to insist on things we don't believe in

Thank you
